

## **CHANGE IN CALCULATORS ALLOWED AT PAPER/PENCIL TEST SITES**

As of May 1, 2014, the only calculators allowed at paper/pencil test sites will be those listed below:

- Casio fx-260 Solar
- Casio fx-300ES PLUS
- Casio fx-300MS
- Texas Instruments TI-30Xa
- Texas Instruments TI-30XIIS

NICET has performed a review of the existing work element programs and has concluded that these calculators are acceptable for use. For exam security, we have found that evolving technology has made it necessary to change our current listing because of communication capabilities and a QWERTY keypad arrangement, similar to a typewriter or keyboard. The devices include, but are not limited to cameras, cell phones, hand-help, laptop, iPads, databanks, data collectors, organizers, pagers or beepers, PDAs, calculator watches, reproduction equipment, electronic dictionaries, electronic translators and recorders. All above calculators can be found at Staples, Target, Wal-Mart, for \$20.00 or under. We will not allow any other calculators to be used. Proctors will/have been informed to either not allow or confiscate any other calculator not found on this amended list.
