

Fire Alarm Systems

Level III Selected General References

Candidates are permitted to bring only the following references into the test center:

<u>Title</u>	<u>Edition*</u>
1NFPA 70	2014
2NFPA 72	2016
3NFPA 101	2015
4IBC	2015

*The test questions are based on the standard editions listed above; therefore, candidates are strongly urged to bring these editions to the exam. Note: candidates may bring older or newer editions—instead of the editions listed above—at their own risk.

Note: An NFPA Handbook will NOT be accepted as a substitute for any of the titles listed above.

Note: References must be bound or secured in a three-ring binder with a title page (example provided on the main program page). They may have highlighted text and self-adhesive index tabs or dividers, however they must be permanently attached. No other additions or modifications to the references are allowed. Handwritten notes are NOT permitted. References with loose paper or pages and freestanding tabs (e.g., repositionable sticky notes/tabs of any kind) are not permitted into the testing centers.

In addition to the references listed above, the following publications can provide some of the job knowledge required by a fire alarm systems technician. While these books may help you prepare for the exam, they are NOT permitted in the test center.

5The Building Professional's Guide to Contract Documents. (2000), Waller S. Poage, Construction Publishers and Consultants

6Computerized Management of Multiple Small Projects. (1992), Richard E. Westney, M. Dekker
