Fire Alarm Systems Certification

Level I Content Outline

Technician Trainee

Level I FAS Technicians are trainees and entry-level technicians who perform limited job tasks under supervision. They are learning, much like apprentices. They learn about FAS components, installation methods, basic tools, worksite safety, testing and inspection. They have at least 6 months of experience in FAS.

1.1 Installation

(Questions related to these tasks make up 44-54% of the exam.)

1.1.1 Mount and terminate peripherals (e.g., initiating and notification devices). 1, 3
1.1.2 Install cabling and associated infrastructure. 1, 2, 3
1.1.3 Comply with job site safety requirements. 4, 5, 6

1.2 Maintenance

(Questions related to these tasks make up 40-50% of the exam.)

1.2.1 Perform periodic testing of systems and devices. 1
1.2.2 Repair/replace impaired/deficient devices. 1, 7

1.3 Submittal Preparation and System Layout

(Questions related to these tasks make up 1-11% of the exam.)

1.3.1 Knowledge of technical documents. 1, 2, 3
