Part II: Work History Education Credit (Please print clearly or type)

If you've achieved a degree in an ABET-accredited engineering technology or engineering program (or equivalent) that is directly related to the certification practice area, you may qualify to receive up to eighteen (18) months (1.5 years) of credit towards the work experience requirement. (ABET is the Accreditation Board for Engineering and Technology; visit www.abet.org to find out if your degree program is accredited.)

To apply for the credit, you must send NICET an official transcript that shows the name of the degree attained, the date of graduation, and a listing of the courses taken. If your degree is not ABET-accredited, you will be responsible for paying any and all expenses incurred by NICET in determining its equivalency.

I have earned the following Engineering Technology degrees:

Associate Bachelor Is the degree ABET-accredited? yes no

Degree: _____ Date Conferred: _____

Institution: _____

Location: _____
